AMENDMENTS TO THE CLAIMS

1   1.   (Currently Amended) A method for delivering a web page to a client,

2 comprising:

3   receiving a request from a client for a web page;

4   ~~comparing the requested web page to a list of cached web pages corresponding to~~

5   ~~cached web pages stored on a web server;~~

6   ~~determining whether a current version of the requested web page is stored on said web~~

7   ~~server; and~~

8   <u>generating a query from a web server to a database server, said database server</u>

9   <u>comprising a plurality of data tables and a web page cache table;</u>

10   <u>examining a flag in a data field in said web page cache table corresponding to said</u>

11   <u>requested web page to determine if the most current version of said requested</u>

12   <u>web page is stored on said web; and</u>

13   returning the <u>most</u> current version of the web page to the client.

1   2.   (Canceled)

1   3.   (Canceled)

1   4.   (Currently Amended) The method of claim ~~3~~ <u>1</u> further comprising:

2 returning the version of said web page stored on said web server to the client if the

3   examination of said flag in said data field indicates that the version of the web

4   page stored on said web server is the most current version of said requested

5   web page.

1   5.   (Currently Amended) The method of claim ~~3~~ <u>1</u> further comprising:

2 generating an updated version of said requested web page if the examination of said

3   flag in said data field indicates that the version of the web page stored on said

4   web server is not the most current version of said requested web page; and

5   returning said updated version of said requested web page to said client.

1   6.   (Original)   The method of claim 5 further comprising:

2   caching said updated version of said requested web page.

1   7.   (Canceled)

1   8.   (Currently Amended)   A system for delivering a web page to a client,

2   comprising:

3   ~~a database server; and~~

4   a web server having a plurality of cached web pages stored therein, said web server

5   being operable to receive a request from a client for a web page and to

6   communicate with said database server to determine if a current version of

7   said requested web page is within said plurality of cached web pages stored in

8   said web server, said web server further being operable to transmit said

9   requested web page to said client upon an affirmative determination that the

10   corresponding web page stored on said web server is the current version of

11   said requested web page;

12   a database server comprising a plurality of data tables and a web page cache table,

13   said database server being operable to examine a flag in a data field in said

14   web page cache table corresponding to said requested web page to determine

15   if the most current version of said requested web page is stored on said web

16   server.

1   9.   (Cancelled)

1   10.   (Cancelled)

1   11.   (Currently Amended) The system of claim ~~10~~ 8 wherein said database server

2   is operable to detect the execution of a database trigger and, in response to detection of

3   execution of said database trigger, is further operable to set said flag to a value indicating that

4   the version of the web page stored on said web server is not the most current version of said

5   requested web page.

1   12.   (Currently Amended)   The system of claim ~~10~~ 8 wherein said web server is

2   operable to transmit the version of said web page stored on said web server to the client if the

3   examination of said flag in said data field indicates that the version of the web page stored on

4   said web server is the most current version of said requested web page.

1   13.   (Currently Amended) The system of claim ~~10~~ 8 wherein said web server is

2   operable to:

3   generate an updated version of said requested web page if the examination of said flag

4   in said data field indicates that the version of the web page stored on said web

5   server is not the most current version of said requested web page; and

6   transmit said updated version of said requested web page to said client.

1   14.   (Original)   The system of claim 13 wherein said database server is

2   operable to update said web page cache table to set said flag to a value indicating that the

3   version of the requested web page stored on said web server is the most current version of

4   said requested web page.

1   15.   (Currently Amended) An information handling system comprising a system

2   for delivering a web page to a client, comprising:

3   a processor;

4   memory coupled to the processor;

5   a plurality of data processing components operable to process data corresponding to a

6   web page;

7   wherein said information handling system is operable to communicate with:

8   a database server; and

9   a web server having a plurality of cached web pages stored therein, said web

10   server being operable to receive a request from a client for a web page

11   and to communicate with said database server to determine if a current

12   version of said requested web page is within said plurality of cached

13   web pages stored in said web server, said web server further being

14   operable to transmit said requested web page to said client upon an

15   affirmative determination that the corresponding web page stored on

16   said web server is the current version of said requested web page;

17   a database server comprising a plurality of data tables and a web page cache

18   table, said database server being operable to examine a flag in a data

19   field in said web page cache table corresponding to said requested web

20   page to determine if the most current version of said requested web

21   page is stored on said web server.

1   16.   (Canceled)

1   17.   (Canceled)

1   18.   (Currently Amended) The system of claim 17 15, wherein said database server

2   is operable to detect the execution of a database trigger and, in response to detection of

3   execution of said database trigger, is further operable to set said flag to a value indicating that

4   the version of the web page stored on said web server is not the most current version of said

5   requested web page.

1   19.   (Currently Amended) The system of claim ~~17~~ 15, wherein said web server is
2   operable to transmit the version of said web page stored on said web server to the client if the
3   examination of said flag in said data field indicates that the version of the web page stored on
4   said web server is the most current version of said requested web page.

1   20.   (Currently Amended) The system of claim ~~17~~ 15, wherein said web server is
2   operable to:
3   generate an updated version of said requested web page if the examination of said flag
4   in said data field indicates that the version of the web page stored on said web
5   server is not the most current version of said requested web page; and
6   transmit said updated version of said requested web page to said client.

1   21.   (Original)   The system of claim 20 wherein said database server is
2   operable to update said web page cache table to set said flag to a value indicating that the
3   version of the requested web page stored on said web server is the most current version of
4   said requested web page.
